

# AutoDrain

Experts in vehicle depollution and fuel recovery

## Air Bag Tool

Safe and efficient air bag deployment for  
End of Life Vehicles

### Efficient

Deploys all makes of air bags in situ

### Safe to use

Pre detonation warning siren

Distance activation

Fully compliant with EU legislation

Includes safety key

### Complete Kit

All necessary connectors supplied  
as standard, no extra purchases  
required.

## Fact!

Air bags are actually classed as 'explosive articles' due to the way in which they work. Deploying an airbag is a dangerous task and should only be done by fully trained and competent workers. You must be aware of your work area at all times during air bag deployment to ensure you are not endangering others.

## Air Bag Training

Training is vital  
to ensure that you  
maximise the profitability  
and longevity of your Air Bag  
Tool:

Certificated training at  
our own IMI accredited  
training centre
