

AutoDrain

Experts in vehicle depollution and fuel recovery

Fixed Fuel Scavenger

Releasing the liquid cash from within
your vehicles

Huge cost saving and money making opportunities

The Scavenger system allows you to remove clean petrol and diesel from vehicles prior to their safe disposal - you can then re-use the fuel or store for future use.

Simple, safe and easy to use

The scavenger complies with all current legislation. The system is compressed air operated and allows you to retrieve precious and very expensive fuel safely and easily.

Ultra versatile, works with all makes and models of vehicles.

With its unique AutoDrain connectivity system you can retrieve fuel from a vast range of vehicles.

Fast retrieval saves you time and money

The fixed fuel scavenger can retrieve up to 50 litres of petrol in less than five minutes.

If you sell or dispose of vehicles that still contain fuel you could be giving away a huge source of profit for your company.

Call AutoDrain to see how much money you can save by extracting precious fuel from your vehicle

Fixed Fuel Scavenger

The Fixed Fuel Scavenger is just one part of AutoDrains range of fuel recovery products. High volume vehicle sale companies can also consider fuel storage tanks, connectivity packs, recovery meters to accurately measure fuel retrieved and re-dispensed, hose reels and water separation units.

Recovery Meters

Water Separators

The Fixed Fuel Scavenger can be installed as part of an integrated system designed to meet your specific requirements. We would be delighted to discuss with you the size of your fleet, the type of fuel retrieval you are looking for, vehicle sales volume and to help you establish your storage and extraction requirements.

AutoDrain Training

Training is vital to ensure that you are maximizing the profitability and longevity of your system and we have the following training options available for you:

Free online training information and video

Certified training at our own ATF in Leeds

Certified training on your site

Price on application

£75,000 p.a. ?

In one of our clients car hire depots, £75,000 worth of fuel is extracted from vehicles prior to disposal every year. That is £75,000 from one depot, in one year
