

AutoDrain

Experts in vehicle depollution and fuel recovery

Fuel Point

Designed to retrieve fuel from End of Life Vehicles

Saves you money

A cost effective system for pumping valuable petrol and diesel from End of Life Vehicles directly to storage for you to reuse.

Space saving

Ultra compact and space saving, perfect if space is an issue. The Fuel Point can be wall or floor mounted.

Works with your existing depollution equipment

Specially designed to be used in conjunction with our Fuel Tank Drill or fuel probes, allowing you to expand your equipment in a modular format.

Efficient and long lasting

Air operated
Suction indicator
Unique AutoDrain connectivity

Product Training

Training is vital to ensure that you maximise the profitability and longevity of your Fuel Point Unit. Training can be provided at our own training centre.
