

Fuel Cleaner

Designed to clean fuel during retrieval.

- Ensures that you retrieve only clean, reusable fuel.
- A simple upgrade to your Fuel Scavenger, adding filtration.
- Works by means of a centrifugal separation system. This removes all sediment and water from the fuel without reducing the fuels flow rate.
- The unit also acts as a sight glass allowing you to easily view the contents as you retrieve fuel.

Fuel Scavenger

If you want to add a simple upgrade to ensure you only retrieve clean and reusable fuel when using your Fuel Scavenger please contact AutoDrain

Call us on 0113 205 9332 to talk to us about the Fuel Cleaner or any depollution issues.
