

# AutoDrain

Experts in Vehicle Depollution and Fuel Recovery

## Mobile Fuel Scavenger

Starting a new business, or adding a Misfuel service to your existing offer? Either way, the AutoDrain Mobile Scavenger is the ideal van-based solution.

### Make money from misfuels?

Remove petrol and diesel quickly at the roadside or on the forecourt after a misfuel. Charge for the call out and then benefit from later reselling the contaminated fuel.

### Easy to use

Minimal installation is required into a wide range of commercial vehicles.

Once installed the Scavenger is simple and easy to operate.

### Safe and efficient

The scavenger is made to a UN approved and certified design with ATEX approved pumping systems.

The large 250L tank will allow you to visit more than one customer before it needs emptying. The Scavengers suction pump can remove 25 litres of fuel per minute minimising your time per call.

The Mobile Fuel Scavenger is suitable for recovering petrol, diesel and fuel contaminated as the result of a misfuel. Once fuel has been recovered you can pump fuel directly from your vehicle storage.

## From HSE- The Safe Recovery of Petrol from Vehicles

Extracting petrol from a vehicles fuel tank is a potentially hazardous operation, as petrol is extremely volatile liquid. Poor equipment can increase the risks of petrol or vapour explosions. You will need to ensure that any equipment is designed and operated to minimise release of petrol vapours. DSEAR places that responsibility on employers to select appropriately designed equipment.

# Mobile Fuel Scavenger

The Mobile Fuel Scavenger can be fitted for side or rear door access, allowing you to fit an RDT to the rear of your van if needed. This allows you to create a dual-purpose vehicle, saving both time and money.

The Scavenger can also be moved between vehicles if this becomes necessary.

Our range of fuel tools come included as standard with your Mobile Fuel Scavenger. They allow a greater range of connectivity, allowing you to speed up the fuel recovery process and maximise efficiency.

## Autodrain Fuel Tools

### FACT!

There are already over 150,000 misfuels each year and the number is continuing to rise. This creates approximately 7.5 million litres of contaminated fuel. By installing a product such as the Mobile Fuel Scavenger in your van, you can attend roadside misfuels and profit from these statistics.
