

AutoDrain

Budget Shocker

Safely & Compliantly removes waste oil from End of Life
Vehicle shock absorbers

A cost effective, combined suction & gravity mobile system for the
draining of shock absorbers

Drill into the shock absorbers, collect the spillage in the gravity
bowl, then use the suction probes to suck out the remaining fluid
below the hole.

*The draining of shock absorbers is compulsory under current EU
legislation. The Budget Shocker will assist you to meet these
regulations.*

Specification

Compressed air suction system with 2mtr hose & valve

Low pressure air discharge with 1.5mtr hose

External level indicator

Flexible probe kit and probe holder

Compressed air operated drill with shroud

Height adjustable offset steel swivel oil gravity bowl

Tool tray

Caster wheels with brake

Vacuum gauge and pressure relief valve

H1550mm x L650mm x W500mm

Net weight 24kg

70 litre capacity

All steel construction
