

QuickDrain Tower

Space-saving depollution equipment for End of Life Vehicles

Our new QuickDrain Tower is narrow to occupy less floor space

>> Easy to use

- Pumps all fuels and fluids directly to storage, saving valuable time
- Simple pipe work connections to storage tanks mean self-installation is possible. Or we can install the unit for you with minimum disruption

>> Maximum productivity

- Compressed air-operated
- Drains fuel and waste fluids quickly and efficiently
- Removes petrol, diesel, oil and coolant

>> Good, clean, re-usable fuel

- Centrifugal action of our unique water separators removes contaminants from fuel, including water and particles, giving you clean re-usable fuel.

The QuickDrain Tower is a depollution system for high speed, safe removal of fuel and waste fluids from your End of Life Vehicles, forming part of your depollution process.

QuickDrain Tower

Space-saving depollution equipment for End of Life Vehicles

Your QuickDrain Tower unit comes complete with:

Our unique fuel tank
drilling system

Guarantees good,
re-usable fuel

Gravity waste oil

Fastest way to remove
oils from the sump

The QuickDrain Tower unit is suitable to drain all fluids out of vehicles and comply with Government legislation on vehicle depollution.

The unique fuel tank drill and fuel cleaners retrieve valuable, high quality fuel for you to sell or reuse!

FACT!

Our customers regularly tell us that one of their favourite key benefits of the QuickDrain range is how the unique water separators effectively clean the fuel during the removal process. This maximises efficiency and saves business precious time, as it leaves you with re-usable fuel at the end.

AutoDrain is the market leader in supplying equipment to the End of Life Vehicle (ELV) industry. Our years of experience in running our own ATF mean that we understand your business needs and what matters to you.

All our products are designed and built to high standards, as well being fully compliant with all HSE and Environment Agency requirements.
