

VapourSafe

The safest way to store contaminated fuel

Safety:

Fully compliant with the Health and safety Executive, the Environment Agency, Trading Standards, the Fire Service and insurance companies
Made from strong fire resistant steel

Features:

Integrally bunded with no further bunding required.
Bund Monitoring
Designed to be moved easily with a forklift truck
No Installation required

Unique sealed vapour transfer system

Are you getting paid for contaminated fuel?

Please ask us for more details.

Specifications:

990 Litre Capacity
Height 1200mm
Length 1900mm
Width 900mm
Net Weight 550kg
Filling and Empty Points

All Steel Constrution

Forklift Base
Brass fittings
Vapour Venting with
Flame Arrester
Dipstick

Store contaminated fuel safely on site

AutoDrain

Experts in Vehicle Depollution and Fuel Recovery

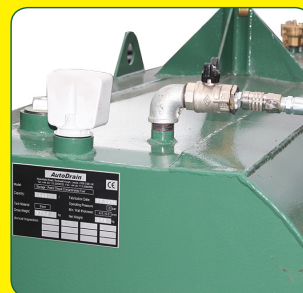

VapourSafe Fuel Recovery and Storage

Explosive fuel vapours can undoubtedly cost lives. Every litre of petrol can generate 15,000 litres of vapour, just a single static spark can cause an explosion with devastating effects.

Fuel vapours are heavier than air and can quickly fill a building, by using AutoDrains VapourSafe Fuel Storage Tank you will have a sealed unit that stores fuel safely and used along side the workshop scavenger, will eliminate dangerous vapours whilst transferring fuels.

Not only making the transfer of fuel much more efficient, the AutoDrain Fuel Tank and Workshop Scavenger would make your site safe by transferring and storing of fuels in a compliant manner.

AutoDrains Unique sealed vapour transfer system creates a safe working environment.
